WORK EXPERIENCE

Data Science Trainee

September 2025 - Present

Fidelity Bank Ghana

- Building and validating predictive models to support decision-making in customer behaviour.
- Developing business-requested reports from scratch and deployed them on the bank's BusinessObjects (BO) reporting platform
- Delivering clear presentations and developing dashboards and automation of reporting workflows, improving efficiency and reducing manual effort using Power BI and Excel that translates complex data into actionable insights for management.
- Analysing data to identify opportunities, inconsistencies, defects, and reconciliation issues.
- Providing recommendations based on data analysis, influencing strategies, marketing campaigns, and operational improvements.
- Querying and mining datasets using SQL to identify trends, anomalies, and opportunities.
- Contributing to a bank-wide core banking application upgrade by supporting report redevelopment, testing, data governance and validation processes.
- Conducting detailed validation of redeveloped reports against legacy system outputs to ensure data integrity and reporting accuracy.
- Working closely with stakeholders, developers, QA analysts, and business teams to resolve data and reporting issues within project timelines.
- Preparing validation documentation, defect logs, and test evidence to support audit and implementation requirements.

- Assisting senior colleagues in preparing management reports, ensuring accuracy and clarity of results.

**Customer Service Representative
MTN Ghana - Accra, Ghana**

June 2024 - August 2025

- Handled high volume of customer calls daily, maintaining professionalism and efficiency while achieving 95%+ first call resolution rate.
